

The **Green** Way

Pitch Deck

We all want to travel sustainably, but breaking old habits is hard.

45%

Of UK commuters drive to work [1]

Commuting emissions are counted as a firm's Scope 3 emissions under the GHG protocol

79%

Of UK companies aren't on track for net-zero by 2050 [2]

0

existing solutions that include sustainable routing and carbon accounting

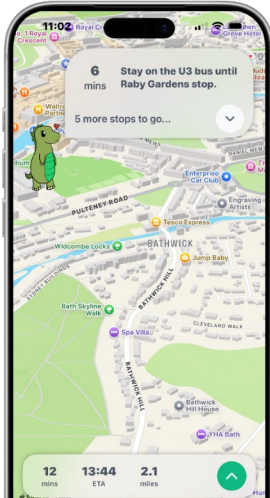

[1] <https://www.gov.uk/government/statistics/transport-and-environment-statistics-2022/transport-and-environment-statistics-2022>

[2] <https://www.accenture.com/content/dam/accenture/final/accenture-com/document-3/Accenture-Destination-Net-Zero-Final>

Our solution

Sustainable navigation built from the ground up for employees.

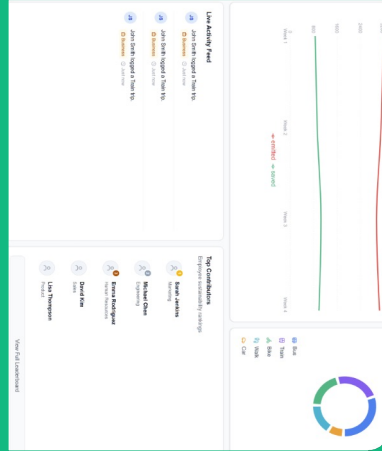

With guidance designed to ease the transition out of commute-by-car.

Corporate travel ESG Dashboard.

Track emissions in real-time, making climate reporting simple.

Set sustainability targets and competitions

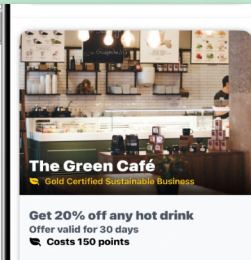

Points

Add up with each eco journey.

Rewards

Available through our partnerships with local sustainable businesses.

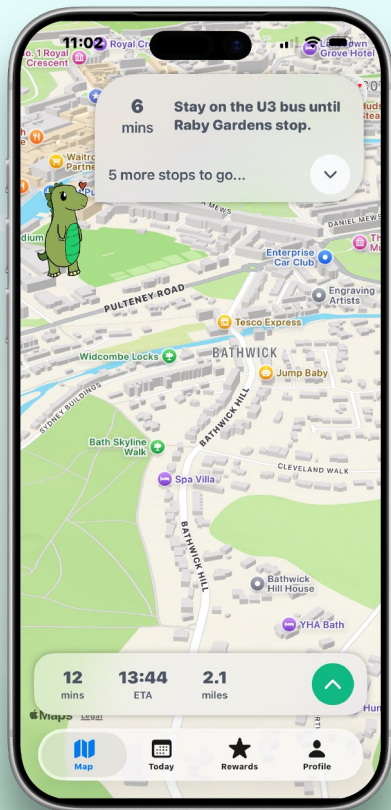

Semester 1 Work:

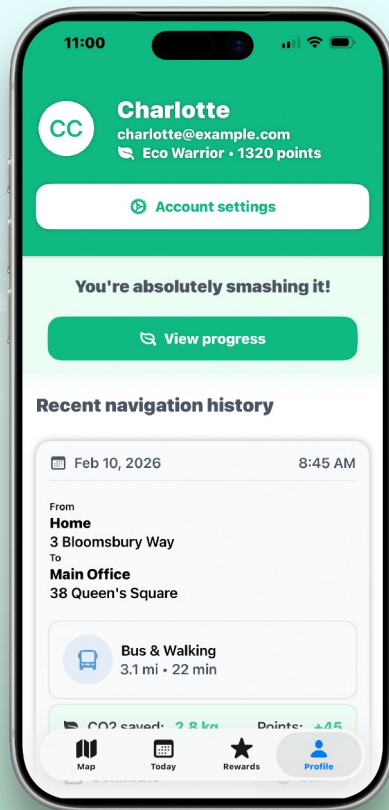

- Business case validated and sized
- Early-stage prototyping
- Competitor Analysis

Semester 2 Work:

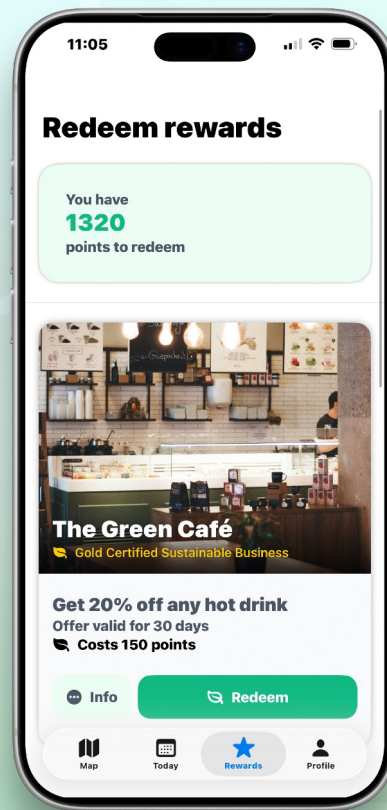

- App MVP complete
- Waitlist signups!
- Startup incubator
- Social media campaign
- Marketing website

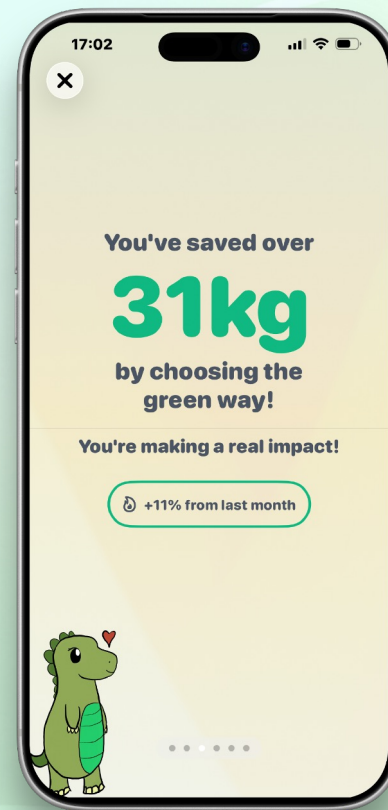

Easy navigation built for sustainability first with step-by-step guidance

Navigation history with saved CO2 emissions stats per journey

Sustainable journeys are rewarded through partner offers

Spotify style gamified Replay – share your sustainability progress

System

Routing Server

Multi-modal Routing Service

Open Trip Planner

Multi-modal transport route calculation from OSM geodata and GTFS public transport data.

Google Cloud Platform

Cloud Run service for serverless compute.

Docker

Stateless OTP Docker Image, easily scalable to demand.

Database Server

Travel Tracking Service

Supabase

Backend service platform providing: Database hosting, Auth integration, Real-time data processing, Managed persistence.

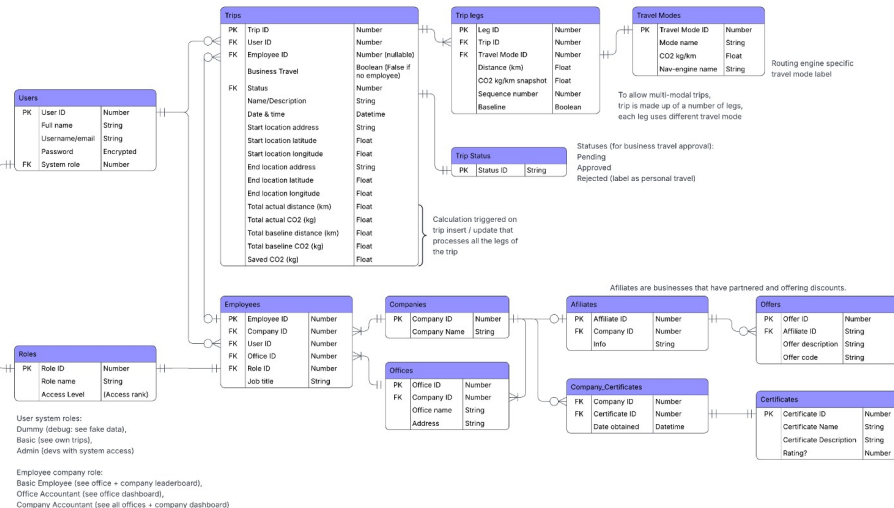

PostgreSQL Database

Supabase provides Postgres relational database with SQL support.

Data

Database is designed to store all user data: Personal / Company accounts, Travel history, Trip details, Automatic carbon calculations, Travel metrics, Auditable data tracking.

Database Schema

GraphQL API

REST API

ROUTING REQUESTS

USER DATA + AUTH

Navigation Web App

Travel Planning Interface

Vercel

Frontend service platform providing: Rapid web deployment, Website hosting, Next.js infrastructure optimisation.

Next.js

React framework to build dynamic, interactive webpages.

MapLibreGL

Efficient interactive map rendering for webpages.

Nominatim

Real-time location search and geocoding to convert to map coordinates.

iOS Mobile App

Unified User-based App

iOS

Functional iOS app optimised for personal mobile devices.

Swift + Swift UI

Native iOS development kit to create powerful UI purpose built for Apple devices.

Apple Maps

Seamless integration of Apple Maps to render interactive maps, route overlays, and real-time GPS location.

Comprehensive Features

Full personal account features: Multi-modal routing, Travel history, Carbon tracking, Travel rewards, Partner offers.

Vaihall

- Initial prototyping
- Fast & memory efficient
- Driving, Cycling, and Walking
- Simple JSON query data

Open Trip Planner

- Complex multi-layer graph structure
- Memory intensive construction
- Full public transit schedule integration
- Combined multimodal routing
- Sophisticated GraphQL query data

Data Sources

Open Data Standards enable interoperability between systems and are the globally standard published format. **OSM** - Open Street Map: Largest free crowdsourced mapping data.

GTFS - General Transit Feed Specification: Industry standard transport schedule data.

Geofabrik - Leading distributor of free OSM files.

Bus Open Data Service - official UK Government digital service providing free, real-time, and static data for all local bus services in England, served as GTFS.

Rail Data Marketplace - Centralised government-funded rail operators data platform provided by Rail Delivery Group.

ATOC Challenge: Converting legacy train data (ATOC) format into the modern GTFS standard to make it compatible with our map engine.

Acceler8: The start-up incubator

The

**9% acceptance rate for
an intensive 5 week course**

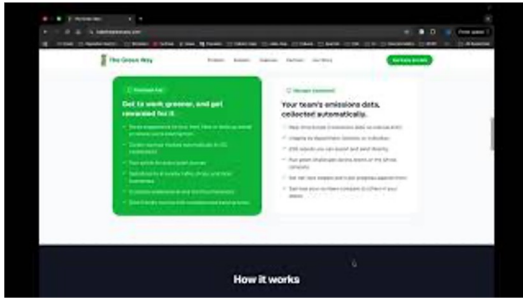

Results

- Refined our GTM strategy
- Built a network of contacts

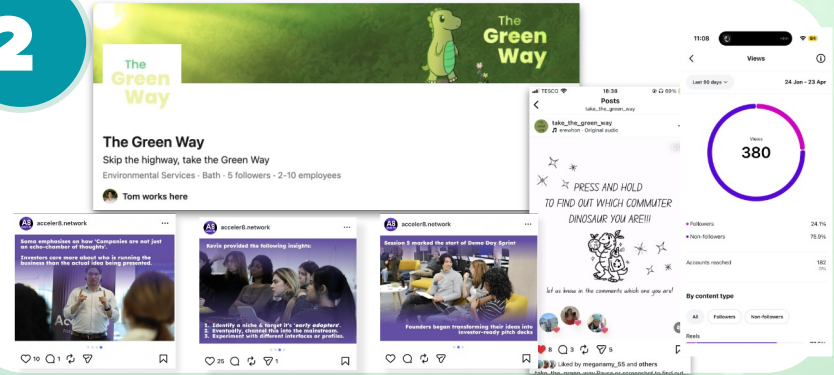

Marketing and Launch Activity

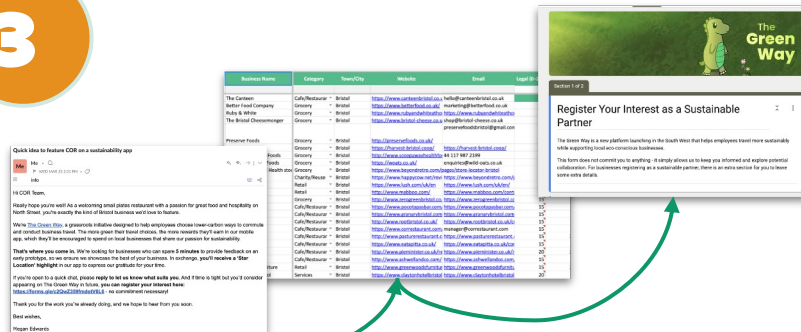

1

2

3

4

Testing and Feedback

- Strong usability features
- Visual design
- 100% task success rate

- Onboarding and help section
- Minor UI issues
- More logical locations for navigation features

“I really enjoyed trialing the app and would love to use it when it launches.”

Ex-employee of MetOffice, 21

“The Green Way app looks so professional, the rewards are such a good idea.”

Ex-employee of Disney, 22

“I love the format of the progress review, it would really motivate me to make more sustainable journeys”

Ex-employee of Visa, 21

“ We have real trouble getting people to care about emissions targets ... this could be the solution”

CPO of a UK consultancy

Pilot Study

- 10 participants
- Think aloud protocol
- 4 tasks

Affiliate Businesses

- Visited local businesses
- Spoke to them about our plan

Corporate Stakeholders

- Think aloud protocol
- Targeted questions about the needs of large corporations

Legal, Ethical and Sustainability

Data Protection

- **Location data is sensitive under UK GDPR**
- **DPIA planned before launch**
- **Only aggregated data shared with partners and employers**

Sustainability

- **ISO 14040 lifecycle assessment for peer-reviewed CO₂ baseline**
- **Guided by Bath PhD Researcher (GWR environmental impact team)**

Inclusive by design

- **We reward improvement, not absolute performance**
- **No manipulative gamification: points reinforce habits, they don't exploit it**
- **Full WCAG 2.1 audit planned before launch**

Social Enterprise

- **Mission driven venture: profits fuel mission not the reverse**
- **Triple bottom line: People, Planet, Profit**

Reflection

Expert advice shaped our technical direction
(LCA standards, "don't infantilise" users)

Acceler8 mentors pushed us to narrow our
target market rather than going broad

Earlier stakeholder outreach

Iterative user testing cycles during dev

Further investment into social media outreach

Forward planning

Next Steps

- **Seeking £10k-£30k seed funding**
- Will follow angel investor contacts & Pitchbook leads
- Goal: **Launch pilot with first corporate clients in Bristol within the year**

Burn Rate & Runway

- **Burn rate (Year 1): ~£500/month** (low - we remain unpaid)
- Costs: Final MVP touches, APIs, hosting, initial marketing
- **Runway: 18-24 months** with seed funding

Revenue Model

- **Small firms:** £60/employee + £1k base
- **Medium firms:** £50/employee + £1k base
- **Large firms:** Negotiated + £5k base
- **Affiliate partners:** currently 0, then £180/year

3-year projection

- **Year 1:** £30k revenue | ~£23k profit
- **Year 2:** £155k revenue | ~£68k profit
- **Year 3:** £311k revenue | ~£142k profit

Meet the Team

Tom Muirhead
Head of Product

- Navigation and backend system
- Learnt rapid prototype design

Charlotte Chrysostom
Head of Design & UX

- Developed iOS MVP and UI themes
- Created Stevie (the Dino!)

Elizabeth Rigby
Head of Sustainability

- Researched legal & ethical compliance
- Learnt full lifecycle thinking

Isabella M. Wong
Chief of Staff

- Business case and pitching
- Learnt how to grow a network

Carissa Choi
Head of Admin

- Operational oversight
- Learnt holistic business strategy

Megan Edwards
Head of Marketing

- User testing and feedback
- Learnt interview structure

Thank you

Any questions?

Very excited to welcome all of you into the next cohort for acceler8 - We have reviewed all the applications and had several interviews with many of the founders that applied. You were selected because we were very impressed by the ideas you've presented and are confident you all have talent it takes to move them forward!

We will have an introductory session tomorrow at 6pm which is a chance to meet each other

the best.

M

Megan Edwards
Chief Customer Officer

Spends most of her time talking to actual customers, then comes back and tells us which of our ideas were bad. Has been right more often than is comfortable.

opportunity.

T

Tom Muirhead
Chief Product Officer

Turns ideas into things you can click on. Insisted on three rounds testing before we shipped anything which was correct to. Does not use the himself. He commutes by motorb
